REMARKS This is UNEVALUATED Information

25X1

1. On 6 February 1951, between noon and 4 p.m., there was continual flying with three twin-engine transports at the Altenburg (N 51/K 27) airfield. The weather was fair. Take-offs and landings were made on the sodded landing field which was free of snow. The flights were made individually and lasted from 15 to 45 minutes. They were conducted northeast of the airfield. The landing field was not marked. The aircraft were not refueled on the field. A total of 30 twin-engine transports were seen at the field. The interior of the hangars could not be observed.
2. 25X1 About 20 soldiers were standing near the twin-engine aircraft. No patrols were seen at the field except for two sentries who were near the former Reich Labor Service Camp south of the airfield. The fact that the occupation of the field was unchanged was confirmed 25X1
- \* 25X1 Comment. It is believed that the Altenburg airfield is still occupied by one air transport regiment, equipped with Li-2s. No construction is being done at the field.
